INTRODUCTION

Colorado Model Content Standards for Foreign Language

This document puts forth a vision of excellence for K-12 foreign language education in Colorado. Foreign Language acquisition consists of building strong communication skills and cultural knowledge.

These **Colorado Model Content Standards for Foreign Language** are designed to provide guidelines (not curriculum) both for districts offering a K-12 foreign language program and for those offering a shorter program sequence. For districts using the K-12 approach, the benchmarks apply to grades K-4, 5-8, and 9-12. For others the benchmarks apply to the beginning, intermediate, and advanced levels. **These levels do not necessarily equate to years of study.**

Foreign Language literacy enables students to:

- connect with other disciplines such as language arts, math, science, geography, and the fine arts;
- acquire information and recognize viewpoints available only through the foreign language and its cultures; and
- understand the nature of language, both foreign and native.

Language study is best begun in kindergarten and continued without interruption through grade 12 and beyond. Research confirms that children easily and naturally acquire language at an early age. The degree of proficiency is directly proportional to the amount of time spent by students in meaningful study, with some languages requiring more time than others to attain the same degree of proficiency. Language learning can be accelerated through immersion in an environment where the language being learned is the primary means of communication, such as in the home, community, foreign exchange programs, and travel. The study of more than one foreign language throughout the educational process should be encouraged. Students studying foreign languages will have the opportunity to become linguistically and culturally prepared to interact successfully as citizens of our community, state, nation, and world.

All standards and their benchmarks have been examined and found to be assessable at the state level. The standards are of general nature in order to accommodate all of the foreign languages taught in Colorado. Before assessment can be addressed, proficiency levels by language and calibrated to grade levels and length of study will have to be developed.
